**A fixed front workstation with a huge 36 litre airlock!**

- The airlock, with powered internal door, provides effective sample and equipment transfer in the fastest possible time whilst ensuring the minimum amount of oxygen is introduced into the chamber.
- Dual gas operation to minimise running costs or order the TG version to further reduce costs.
- Includes automatic commissioning cycle to save you time and resources.
- Options include HEPA filtration, a refrigeration unit, and an integrated Anaerobic Conditions Monitor with data download facility.

The Whitley A85 is used when there is a need to easily process, incubate and examine samples without exposure to atmospheric oxygen. This anaerobic workstation has a large, 36 litre airlock and accommodates up to 560 x 90mm plates. Oval glove ports enable you to work comfortably, gloved or bare handed. Each gloveport also acts as a mini-airlock so you can transfer up to 10 plates through each as you insert or withdraw your arms.

The colour, touch-screen control panel ensures ease of use and is perfect for visual display of parameters such as temperature, humidity, and airlock cycle status.

The A85 Workstation can be purchased with the Whitley Internal HEPA Filtration System or can include a refrigeration unit should you want to

[VIEW SPECIFICATION](#)

And for twice as much space, there's the A95 Workstation with 4 ports
